1. Abstract

The theme of the project is to create a six-day Youth Forum series from March 26 to March 31, 2019, in cooperation with IFOAM Asia. Activities include organic youth workshops (March 26-March 28), international seminars (March 29) and local visits (March 30-March 31).

The Organic Youth Workshop has 22 international students from 11 countries and 28 local Taiwanese participants. Through a three-day workshop, from the basic concepts of organic agriculture, organic farm planning, production and marketing, IFOAM Asia's professional lecturers gave lectures and took the students' thinking in the workshop, successfully cultivating 50 seeds for promoting the concept of organic agriculture in the future. The 25 students in Taiwan will also receive the bonus from the New Taipei City Government to encourage them to continue to engage in or promote organic farming in Taiwan.

The international seminar held on March 29th, Youth Day, was attended by 12 professional lecturers at home and abroad, from the agricultural law and marketing of organic agriculture, and attracted more than 450 people to participate. The New Taipei City Government IFOAM Asia signed a Memorandum of Understanding (MOU) to develop the Asia Organic Marketing Intelligence Center, laying the foundation for the next phase of cooperation.

The last two days of local visits were mainly designed for all students and foreign guests. The two-day visit learned about the New North City government's process of promoting organic nutrition lunches, and also learned from Kaohsiung and Pingtung about Taiwan's production mode of promoting organic agriculture. With the research results, the promotion results of Taiwan's organic agriculture are presented to VIPs at home and abroad, which enhances international visibility.

The six-day series of activities was successfully completed with the assistance of all parties. All the content was well received by domestic and foreign students. At the same time, the concept of organic agriculture was promoted to the localities through the fan pages of the Green Living Museum. It is expected to be Taiwan and Asia. The organic farming movement carries out new possibilities.

2. Declaration

Declaration of the 4th IFOAM Asia Organic Youth Forum

We, the participants of the 4th IFOAM Asia Organic Youth Forum, are thankful to IFOAM Asia and the New Taipei City Government for hosting the Forum.

We enjoyed sharing our experiences and learning best practices from eminent organic pioneers.

We, as future leaders, embrace our role and commit to lead the next phase of the organic movement.

We solemnly declare the following:

1. We uphold the four Principles of Organic Agriculture - Health, Ecology, Fairness and Care- and apply these Principles in all aspects of our life. We shall work hand-in-hand with all stakeholders from public to private sector to see the Principles adopted.
2. We follow the mission and vision of IFOAM Asia Organic Youth Forum and empower the organic movement in our countries.
3. We strive to cooperate with governments to ensure that young organic leaders participate in decision-making processes.
4. We encourage governments to support young organic farmers with capacity building opportunities, financial support, and market access.
5. We urge governments to recognize the importance of Organic Agriculture in climate change mitigation and adaptation.
6. We plan to work with all stakeholders to ensure the adoption of organic lunch programs across schools.
7. We strive to improve the quality of life for our farmers, women, indigenous people and marginalized groups in our societies.
8. We, as the young stewards of Nature, take the responsibility to preserve our planet for future generations.
9. We aim to work for the creation of a World Organic Youth Forum for knowledge exchange and synergies to promote Organic Agriculture in Asia.

Adopted by the Participants of the 4th IFOAM Asia Organic Youth Forum

in New Taipei City, Taiwan on March 28th, 2019

Data and Information Manager, Research Institute of Organic Agriculture (FiBL)
有機農業研究所 (FiBL) 數據資訊經理

Julia Lemoud is an IFOAM – Organics International World Board member and a Data and Information Manager of the Research Institute of Organic Agriculture (FiBL). For the last seven years, she has been working on the collection of organic market data worldwide and the production of the annual report “The World of Organic Agriculture”. Since 2014, she has been collecting key market data on voluntary Sustainability Standards worldwide for FiBL and producing the “The State of Sustainable Markets” report in partnership with the International Trade Centre (ITC) and the State of Sustainability Initiatives (SSI).

She grew up on her family’s organic farm and worked for six years at the family company, El Rincon Organico, an organic retailer, exporter and restaurant. Over the years, Julia completed several internships in different organic organizations in Latin America and Europe. Since 2010, she has been advocating for the involvement of young people in all spheres of the organic sector. Together with a group of young entrepreneurs, in 2011, started a group called Young Organics, which aimed to connect young organic actors and to enhance knowledge transfer between generations. Nowadays, she is working for the empowerment of organic youths from within IFOAM – Organics International.

Julia Lemoud 是國際有機農業運動聯盟 (IFOAM – Organics International) 世界委員會的理事，同時也是有機農業研究所 (FiBL) 數據資訊經理。在過去七年中致力於全球有機市場相關數據的蒐集，以及《有機農業世界》年度報告的出版。自2014年以來，為有機農業研究所 (FiBL) 蒐集全球符合永續發展標準的市場相關數據，並與國際貿易中心 (ITC) 和永續發展倡議 (SSI) 合作發表《永續發展市場現況》報告。

成長於自家有機農場，並在兼具有機零售、出口商和餐廳的家庭企業 El Rincon Organico 工作了八年。多年來 Julia 分別在拉丁美洲和歐洲各國不同的有機組織實習。自2010年起，倡導年輕人在有機領域的參與，並於2011年與一群年輕企業家創辦「青年有機」(Young Organics) 團體，旨在加強有機青年農民的串連，以及世代間知識的交流。目前，她致力於增加有機青年在國際有機農業運動聯盟 (IFOAM – Organics International) 內部的參與決策權。

Topic: Organic Value Chain Development in Taiwan

講題: 農業六級化整合方案-三生一體, 產城融合

講者簡介:

Yongjin Organic Farm has assisted in the development of agricultural platforms and the introduction of advanced agricultural technology with the help of experts from multiple sectors, cultivated a diversity of high-quality organic crops that are free of chemical pesticides and fertilizers. Furthermore, they developed agricultural products, adding value to farm products through branded packaging which also help protect the environment and provide ecological education, make natural and human landscapes a key tourism asset, and at the same time drive economic growth in urban and rural areas. Agriculture is a profession, and organic production requires a planned approach and the introduction of modern technologies to boost agricultural development. Yongjin Organic Farm aims to build a strong organic sector that supports food producers and integrated value chains that link farmers to the market for a healthy environment, economic profitability, and social and economic equity.

Chia-Wei Chang 張家偉
Section Head, Agriculture Department, New Taipei City Government
新北市府農業局長 局長

Topic: New Taipei City Government's Organic Farming Policies

講題: 新北市推動有機農業之經驗

講者簡介:

Through collective efforts, New Taipei City government provides guidance to farmers and coordinates the supply and distribution of goods. Together, along with a company willing to invest in a high-out vegetable facility as well as school cooperation and assistance, the city has so far supplied fresh organic vegetables to 623 schools and public trusts in New Taipei, benefiting some 360,000 children in addition to measures in support of farmers' access to markets. New Taipei City government introduced smallholders to the participatory guarantee system or PGS in 2016. Since 2017, it has piloted live auctions for organic crops to expand distribution channels for small organic growers in Taiwan. By bringing together networks of farmers and urban citizens, the overall value and agricultural yield of organic products across the country have increased by 15 times, resulting in better access to healthy food in the city and more recognition for agroecological farmers.

新北市推動有機農業午餐供應有機蔬菜時, 有機與不有機, 但透過市府的努力, 從產地農友的合作、供應單位配合調配運量及冷链物流的配送, 到企業願意投資專門切有有機蔬菜的廚房, 最後是讓消費者及各學校的配合協助, 至今已讓新北市的65所中小學校、幼兒園及公托都吃新鮮的有機蔬菜, 約有36萬名孩童受益。除了透過技術輔導, 土地及資源整合等鼓勵有機生產的經驗, 2016年起導入多方參與式保證系統 (Participatory Guarantee System, PGS), 推動成為符合國際認證的友善農業城市, 2017年率先開辦有機拍賣, 擴大全台有機小農的銷售管道。

隨著中央農委會調降補助4至10成政策, 全臺有機農業產量及價值已擴張為當年10倍, 把有機從農業市場導入工業界的商業, 成為一個永續發展的產業。

Topic : Global Development Trends in Sustainable Agricultural Products
講題：農產品永續發展之國際趨勢

講題簡介：

Current and future trends in international development are farmers that adopt environmentally sound management practices. Certification began as a mechanism for addressing social and environmental problems while also ensuring traceability in food products. Modern agri-businesses are starting to recognize the benefits of obtaining organic certification, which enhances farm prices, raises a farm's profits, increases market access, can provide producers price premiums, and enables inclusion in global value chains. The verifying role of organic certification services is also a means of delivering truly sustainable agriculture.

Mathew John
 Founding Director, Keystone Foundation
 Keystone基金會 創始人兼執行長

Mathew John is a Founding Director of the Keystone Foundation and the Managing Director of Last Forest Enterprises, a social enterprise incubated by Keystone. He was on the Board of the International Federation of Organic Agriculture Movements (IFOAM - Organics International) for two terms. Mathew was also a member of their International Committee on Participatory Guarantee Systems (PGS) which encourages the development and adoption of simple and different approaches to guaranteeing organic produce. He was also part of the team to initiate the PGS in India, which the Government of India now recognizes and promotes.

Passionate about initiating market access for smallholder farmers and producers, as a member of the Fair Trade Forum - India, he oversees the umbrella branding exercise of retail stores within the country. Last Forest is also a guaranteed member of the World Fair Trade Organization (WFTO). The enterprise runs a chain with a store and a Slow Food restaurant. Mathew is on the Board of Slow Food India and continues to build links with this movement. Outlook Business Magazine listed him among the top 25 Social Entrepreneurs of India and the Times Now TV Network featured him as an Amazing Indian.

Mathew John是Keystone 基金會的創始人兼執行長，也是基金會孕育的社會企業——Last Forest Enterprises的總經理。曾兩度任職於國際有機農業運動聯盟 (IFOAM - Organics International) 世界理事，同時也是參與式保證系統 (PGS) 國際委員會成員，該系統鼓勵發展和採用簡單及有效於第三方驗證的保證方式來確保有機農產品的生產。Mathew是啟動印度參與式保證系統 (PGS) 團隊的成員之一，目前印度政府認可這種保證系統。

熱衷於為小農和生產者開拓市場通路，身為印度公平貿易論壇 (Fair Trade Forum - India) 的成員，他負責監督該論壇的傘式品牌推廣活動。Last Forest Enterprises 也是世界公平貿易組織 (WFTO) 所認證的會員。其經營的連鎖店包含了四家商店和一家慢食餐廳。Mathew是印度慢食 (Slow Food India) 董事會成員，他持續地藉此運動與外界建立聯繫。Outlook Business Magazine 將其列入印度前25大社會企業家，他同時也是 Times Now TV Network 所製播節目Amazing Indian的報導人物之一。

slido

1)劉鈺鈴

today, 3:55pm

To Tagupa, the Philippines past the organic farming regulation in 2010, have you encountered any difficulties?

2)Anonymous

today, 3:33pm

Mr. Tagupa: What are the entry qualifications, obligations of the members of LOAMC-PH? How to unit all the municipalities amd cities in such a broad country?

3)Anonymous

today, 3:25pm

How to attract young people to take part in Organic?

4)To Ms Bai, it seems there are a lot of improvements to make in agriculture, can you share the process of technology implementation in smart farming and how can it turn a profit?

5) Anonymous

today, 3:25pm

To Mr Tagupa, how did the Philippines open the organic market? Organic products are more pricy and in many cases, people are not willing to buy them.

6) OF

today, 3:35pm

To Ms Bai, it seems there are a lot of improvements to make in agriculture, can you share the process of technology implementation in smart farming and how can it turn a profit?

7) Anonymous

today, 3:35pm

Miss Bai, have you encountered any difficulties in the implementation of smart farming?

8) Shofyan (Indonesia organic farmers)

today, 3:35pm

To Kelly pay, what kind and name of microorganism that you use in your farm and what the function?

9) Anonymous

today, 3:35pm

To Ms, Bai, how did you change from pig/fish farming to agriculture.

10) Anonymous

today, 3:35pm

Mr. Jung: what are the challanges to transform CSA to common market? How do you cope with them?

11) Anonymous

today, 3:35pm

To Ms Li, some of the people see Leezen as an organic retail channel. Will Leezen set up clear standards to classify "organic" and "safe" food to make it easier for consumers when they are making the purchase?

12) Anonymous

today, 2:40pm

To Ms. Bai, i would like to know if farmers have adopted smart farming, how do they think of smart farm? And how to assist farmers to convert to smart farming?

13) Anonymous

today, 1:38pm

To Miss Bai, how to grow cell wall from shrimp? It's a revolutionary invention.

14) Anonymous

today, 12:28pm

ToM Simpfendörfer, some Taiwanese biodynamic farmers bought ingredients from abroad (like cow's horn), is it sustainable? Aren't there localized biodynamic methods?

15) Nimo

today, 12:28pm

To Mathew John: how much does it cost for PGS? What does it differ from the 3rd party certification in cost structure for small holder? Thanks!!

16) Anonymous

today, 12:27pm

How to get the consumer to trust the PGS certified products instead of the organic certified products?

17) Anonymous

today, 12:19pm

To Matthew, it seems that the government plays an important role to encourage all the farmers to join the PGS and make it workable, if there are

only few farmers in the PGS, would encouraging consumers to join improve the current situation?

18)

*Anonymous

today, 12:16pm

To mr.mathew To Mr. Mathew , in the PGS, how to avoid problems of farmers covering up each other?

19) Anonymous

today, 11:59am

All: Some people ask, "Can OA Farming feed the growing population?". Synthetics was introduced addressing the increased needs of food, so how to deal with that?

20) Organic farmer

today, 11:45am

Macro Schlüter Expect for biogas, are there any successful case of organic farm connected with wind/water turbine or solar cells? Danke!

21) Organic farmer

today, 11:44am

Marco Schlüter I' m a farmer with Energy Science background. Germany has developed Green Energy over 20 years!

22) Anonymous

today, 11:35am

How to improve the organic tea pest problem?

23) Ivy

today, 11:32am

Question to Christoph Simfendorfer: Is there any chance to visit your farm? How could I contact with you? Thank you😊😊

24) Anonymous

today, 11:27am

Christoph Simpfendörfer Hi, Biodynamic agricultural is great but has not become popular yet in Taiwan. Will Demeter engage more activities in Taiwan?

25) Anonymous

today, 11:27am

Marco Schluter, after a label is in the market, how do you communicate its value to the public and farmers to balance the market values of each labels and encourage more people to buy the product?

26) Anonymous

today, 11:22am

Since 1982, Naturland has established different labels that have different values of environmental social value and fairness concern, how to differentiate labels that developed in different time?

27) Organic farmer

today, 11:16am

To David Huang, SGS charges 6600 NT for each pesticide testing, it's a big burden for the framers especially I have to send 3-5 products to test. Will the testing be more affordable in the future? Thanks

28) Anonymous

today, 11:17am

To Christoph, I want to know the difference in the impact of using native cows and foreign breed of cows for BD preparations.

29) Anonymous

today, 11:36am

Do the you look for your farmers or do the farmers approach you? Do you charge any fee for service & consulting?

30) Organic farmer

today, 11:16am

Christoph Simpfindörfer In near future, will Demeter consider to have a Taiwan branch office to examine and offer Demeter certificates in Taiwan?
Danke!

31) Anonymous

today, 11:35am

To David Huang, from the current SGS, how do the company communicate "sustainability" to the public?

6. Introduction of Speakers

Julia Lernoud

Data and Information Manager, Research Institute of Organic Agriculture (FiBL)

Julia Lernoud is an IFOAM - Organics International World Board member and a Data and Information Manager of the Research Institute of Organic Agriculture (FiBL). For the last seven years, she has been working on the collection of organic market data worldwide and the production of the annual report "The World of Organic Agriculture". Since 2014, she has been collecting key market data on Voluntary Sustainability Standards worldwide for FiBL and producing the "The State of Sustainable Markets" report in partnership with the International Trade Centre (ITC) and the State of Sustainability Initiatives (SSI).

She grew up on her family's organic farm and worked for six years at the family company, El Rincón Orgánico, an organic retailer, exporter and restaurant. Over the years, Julia completed several internships in different organic organizations in Latin America and Europe. Since 2010, she has been advocating for the involvement of young people in all spheres of the organic sector. Together with a group of young entrepreneurs, in 2011, started a group called Young Organics, which aimed to connect young organic actors and to enhance

knowledge transfer between generations. Nowadays, she is working for the empowerment of organic youths from within IFOAM - Organics International.

Victoriano Ih Tagupa

Executive Director,

League of Organic Agriculture Municipalities and Cities in the Philippines (LOAMC)

Victoriano Ih Tagupa is currently the Executive Director of the League of Organic Agriculture Municipalities and Cities in the Philippines (LOAMC-Ph). LOAMC is a coalition of more than 120 mayors in the Philippines who are strong advocates for organic agriculture and are implementing various organic agriculture ordinances in their respective cities and municipalities. He is also the President of the Sustainable Agriculture and Family Centered Entrepreneurial Group of Co-Creators Incorporated (SAFEGCC Inc.), a family farm learning site. Prior to this, he was the Executive Director of Sustainable Agriculture Center in the Philippines for more than 20 years.

Marco Schlüter

International Development Manager, Naturland e. V.

Marco Schlüter has over 20 years experience in organic business, management and politics. He is a former Director of IFOAM EU and works currently as Naturland' s International Development Manager.

Mathew John

Founder-Director, Keystone Foundation

Mathew John, Founder **and** Director of Keystone Foundation, is also the Managing Director of Last Forest Enterprises, a social enterprise incubated by Keystone. He was on the Board of the International Federation of Organic Agriculture Movements (IFOAM - Organics International) for two terms. Mathew was also a member of their International Committee on Participatory Guarantee Systems (PGS) which encourages the development and adoption of simple and different approaches to guaranteeing organic produce. He was also part of the team to initiate the PGS in India, which the Government of India now recognizes and promotes.

Passionate about initiating market access for smallholder farmers and producers, as a member of the Fair Trade Forum - India, he oversaw the umbrella branding exercise of retail stores within the country. Last Forest is also a guaranteed member of the World Fair Trade Organization (WFTO). Last Forest runs a chain with 4 stores and a Slow Food restaurant. Mathew is on the Board of Slow Food India and continues to build links with this movement. Outlook Business Magazine listed him among the top 25 Social Entrepreneurs of India and the Times Now TV network featured him as an Amazing Indian.

Man Chul Jung

President, Institute of Rural Development and Local Governance

Man Chul Jung is currently the President of the Institute of Rural Development and Local Governance. He is also a Board member of IFOAM Asia. As Vice President of the Institute of Korea Rural Society since 2017, he was the expert adviser of Agricultural Policies for the Office of Organic Agricultural Policies Development of Hongseong County in South Korea. From 2009 to 2015, Jung was the Senior Researcher of the Climate Change Response Team Foundation of Agri. Tech. Commercialization & Transfer (FACT) and the Rural Development Administration (RDA) for various divisions between 2003 and 2009, which included the Organic Agriculture Division. He received his M.S. and Ph.D. in Agricultural Economics from Kobe University.

Christoph Simpfendörfer

General Secretary, Demeter-International

Christoph has a degree from the Agricultural College in Nürtingen, Germany. From 1986 to 2018, he was a farmer responsible for the development of a 38 ha mixed farm in Reyerhof, Stuttgart, Germany. For many years, he was a Board member of Demeter-Bund, and later the Chair of the Supervisory Board of Demeter e.V. For 10 years, he served on the Board of Demeter-International as its first General Secretary.

Since 1990, Reyerhof is owned by a company with more than 50 families as shareholders. In 1991, a specialized organic food shop was established on the farm. Since 2013, Community Supported Agriculture (CSA) exists with currently 400 shareholders and in 2018, a cooperative was founded to enable succession to the next generations.
